EMPLOYMENT

2021 – 2023 **PhD in Probability** | LPSM - Sorbonne Université (Paris – France)

Funded by *École Doctorale de Sciences Mathématiques de Paris Centre 386*
Supervised by *Idris Kharroubi* (Professor, Sorbonne Université)
Topic: My research interests are *Stochastic control* and its interaction with other fields. I try to link different dynamics, like Branching processes or Superprocesses, to look for new PDE characterisations. Recently, I have started studying the probabilistic aspects of diffusion models, trying to explain their convergence theoretically and generalising these methods to wider fields.

EDUCATION

2019 – 2020 **Master 2 – Probability and Finance (ex-DEA *El Karoui*)** | École Polytechnique – Sorbonne Université (Paris – France)

Courses: Introduction to diffusion processes, Numerical probability for finance, Optimization and stochastic control, Machine learning, neural networks and deep learning, Risk measurements and extreme values theory, Stochastic processes and derivatives, High-frequency trading, Introduction to Jump Models, Evolution of Practices and Regulation, Valuation and Risk Management in Energy Markets, Stochastic Algorithms
Mention: *Bien*

2018 – 2019 **Master 1 – Mathematics and Applications** | Sorbonne Université (Paris – France)
Average: 18.47/20

2015 – 2018 **Bachelor's degree in Mathematics**| Università degli Studi di Padova (Padova – Italy)
Mark: 110/110 cum laude

2010 – 2015 **High School** (Italy)
Mark: 100/100 cum laude

ARTICLE DRAFTS

2023 **Controlled superprocesses and HJB equation in the space of finite measures**, Antonio Ocello, arXiv:2306.15962

Abstract: This paper gives the formalism to consider a class of stochastic control problems where the underlying controlled system is a super diffusion. We prove the existence of these processes as weak scaling limits of controlled branching processes. We derive a dynamic programming principle for our stochastic control problem by proving their uniqueness in law. This opens the way to a PDE characterisation for the associated value function, that relies on the notions of derivations in the space of finite positive measures. We conclude by proving that the value function is a solution to a Hamilton-Jacobi-Bellman PDE in the viscosity sense.

2023 **Relaxed formulation for the control of branching diffusions, Existence of an optimal control and Linear Quadratic problem**, Antonio Ocello, arXiv:2304.07064

Abstract: We study the existence of optimal control for branching diffusion processes. We give a suitable relaxed formulation, showing a characterisation that relies on martingale measure. We introduce atomic control, proving them to be a copy of strong controls via their uniqueness in law and Doob's functional representation theorem. Under a Filippov-type convexity condition, we prove the equivalence between the strong and relaxed problem. Given the definition of the control rule, we re-read this problem as an optimisation of a continuous function over a compact set, proving the existence of optimal control. We then prove that the value functions satisfy a variational inequality. This helps us give a verification theorem, which we apply to an example of a Linear-Quadratic problem.

2022 **A Stochastic Target Problem for Branching Diffusions**, Idris Kharroubi, Antonio Ocello, arXiv:2206.13267

Abstract: We consider an optimal stochastic target problem for branching diffusion processes. This problem involves finding the minimal condition for which a control allows the underlying branching process to reach a target set at a finite terminal time for each branch. This problem is motivated by an example from fintech where we look for the super-replication price of options on blockchain-based cryptocurrencies. We first state a dynamic programming principle for the value function of the stochastic target problem. We then show that the value function can be reduced to a new function with a finite-dimensional argument by a so-called branching property. Under wide conditions, this last function is shown to be the unique viscosity solution to an HJB variational inequality.

2022 **Tsunami hazard linked to submarine landslides on the Alboran Sea**, Sara Lafuerza, Alain Rabaute, Maud Thomas, Jacques Sainte-Marie, Apolline El Baz, Marie-Odile Bristeau, Antonio Ocello, Anne Mangeney, Elia d'Acremont (in progress)

PROFESSIONAL ACTIVITIES

2020 ***Off-cycle internship*** | BNP Paribas Asset Management - Quant Research Group (Paris, France) *6 months*

- Development of multi-factor models on the credit market to generate positive alpha. Model selection, data analysis, and backtesting.

- Responding quickly to client queries. Cashflow simulations that take into account the risk of default and the risk of reinvestment. Construction of a client-serve infrastructure and of a GUI via dash.

2019 **Internship** | LPSM - Sorbonne Université (Paris – France) *3 months*

Applications of statistical models and extreme values theory to explain the magnitude of marine risks in collaboration with geologists
Supervised by: *Maud Thomas* (Assistant professor, Sorbonne Université)

2015 – 2017 **Barman** | "Al Vicolo", Castelfranco Veneto (TV), Italy

TEACHING EXPERIENCE

2022 – 2023 - *Numerical probability and computational statistics* (Master 1, Mathematics, Sorbonne Université, computer labs)

2021 – 2022 - *Numerical probability and computational statistics* (Master 1, Mathematics, Sorbonne Université, computer labs)
- *Statistical modelling* (1st year, Master in Mathematics, Sorbonne Université, computer labs)
- *Stochastic calculus* (1st year, Master in Actuarial science, ISUP, exercise classes)

2021 – 2022 - *Numerical probability* (1st year, Master in Mathematics, Sorbonne Université, computer labs)
- *Stochastic calculus* (1st year, Master in Actuarial science, ISUP, exercise classes)

2017 – 2018 - *Affine, Euclidean, Hermitian and Projective Geometry* (1st year, Bachelor in Mathematics, Università degli Studi di Padova, exercice classes)

SCIENTIFIC ACTIVITIES

2021 – 2023 **PhD students representative** | École Doctorale de Sciences Mathématiques de Paris Centre 386, Paris, France
Representative of the doctoral students in all the École doctorale (ED) 386 *bodies (Council, etc…), bringing up requests or proposals and their criticisms about funding, training, scientific animation or ED policy. Member of the comity for the attribution of ED386 doctoral contracts to the following year's candidates. Mediator between the doctoral student and the ED to bring to the attention of the ED a complaint or a request related to the non-respect of the thesis charter.*

2021 – 2023 **PhD students representative** | LPSM - Sorbonne Université, Paris, France
Representative of PhD students in the Council of LPSM

2022 – 2023 **Co-organizer of InfoMaths** | Sorbonne Université, Paris, France
InfoMaths is a seminar about informatics tools for mathematicians

2022 – 2023 **Co-organiser of Les Probabilités de Demain** | Paris, France
Les Probabilités de Demain *is a conference that aims to bring together probabilists from the Paris region. It is based on presentations by doctoral students from Île-de-France, with an introduction by a renowned researcher.*

2021 – 2023 **Co-organiser of the PhD students seminar** | LPSM - Sorbonne Université, Paris, France

2016 – 2018 **Bachelor and Master students representative** | Università degli Studi di Padova, Padova, Italy
Link between students and faculty members, including participation in meetings with professors and researchers; member of Gruppo per l'accreditamento e la valutazione *(GAV), group for pedagogical evaluation in the Mathematics Department*

INVITED TALKS

March 2023 **Probabilistic methods in population biology**, TU Darmstadt, Darmstadt, Germany

December 2022 **Finance group seminar**, Pôle Universitaire Léonard de Vinci, Courbevoie - La Défense, France

November 2022 **Potsdam Research Seminar in Probability Theory**, Universität Potsdam, Potsdam, Germany

November 2022 **PhD students seminar of the LPSM**, LPSM - Sorbonne Université, Paris, France

September 2022 **London-Paris Bachelier Workshop**, Henri Poincaré Institute (IHP), Paris, France

June 2022 **Third Italian Meeting on Probability and Mathematical Statistics**, Università degli Studi di Bologna, Bologna, Italy

April 2022 **PhD students seminar of the LPSM**, LPSM - Sorbonne Université, Paris, France

April 2022 **Mathematical and statistical methods for Actuarial science and Finance (MAF2022)**, Università degli Studi di Salerno, Salerno, Italy

ACADEMIC HONOURS

2018 - 2020 Fondation Sciences Mathématiques de Paris | **Scholarship PGSM for the Master's degree**

2017 - 2018 Università degli Studi di Padova | **Scholarship "Mille e una lode"**
Scholarship awarded to the top 3% of the University's best students

SKILLS

LANGUAGES ITALIAN (*native speaker*) ; ENGLISH (*level C1*) ; FRENCH (*level C1*) ; SPANISH (*level C1*)

IT Python, R, LaTeX, MATLAB, C++, Mathematica

ATTENDED CONFERENCES AND SCHOOL

July 2023 43rd Conference on **Stochastic Processes and their Applications**, Lisbon, Portugal

May 2023 **Elisabeth Gassiat - a path in modern statistics**, Institut de mathématique d'Orsay, Orsay, France

March 2023 **Probabilistic methods in population biology**, TU Darmstadt, Darmstadt, Germany

January 2023 **Journées YSP (Young Statisticians and Probabilists)**, Henri Poincaré Institute (IHP), Paris, France

December 2022 **Les Probabilités de Demain**, Henri Poincaré Institute (IHP), Paris, France

December 2022 **Workshop on Mean Field Games and Applications**, Centre de recherche Lagrange en mathématiques et calculs, Paris, France

June 2022 **9th International Colloquium on BSDEs and Mean Field Systems**, Université Savoie Mont-Blanc, Annecy, France

June 2022 **Third Italian Meeting on Probability and Mathematical Statistics**, University di Bologna, Bologna, Italy

May 2022 **Stochastic Games and Martingale Optimal Transport**, Università degli Studi di Milano, Milano, Italy

May 2022 **Mathematical and statistical methods for Actuarial science and Finance (MAF2022)**, Università degli Studi di Salerno, Salerno, Italy

February 2022 **Journées YSP (Young Statisticians and Probabilists)**, Institut Henri Poincaré, Paris, France

February 2022 **Les Probabilités de Demain**, Institut Henri Poincaré, Paris, France

October 2021 **Workshop on *Mean-field reinforcement learning and applications***, King's College, London, UK

September 2021 **Les Probabilités de Demain**, Institut Henri Poincaré, Paris, France

May 2021 **Conference of Numerical Probability in honour of Gilles Pagès' 60th birthday**, Sorbonne Université, Paris, France

May 2019 **Conférence en l'honneur des 3×25 ans de Nicole El Karoui**, Sorbonne Université, Paris, France

June 2019 **Workshop on *Phase Transitions and Particle Systems***, Weierstrass Institute, Berlin, Germany
